Hard and soft tissue management in modern implantology

Dr. Roland Török

Date: 21\textsuperscript{st} and 22\textsuperscript{nd} of June 2013

Venue: Lina-Ammon-Strasse 17
90471 Nuremberg
Course Director
Dr. Roland Török

... is the founder of „Implant Institute Török“, it was developed in 2008 to provide quality continuing education on the subject of dental implants. Since 2003 he is lecturing in Germany and many other countries about implants and bone regeneration, he is also working in the development for augmentation materials and implant design with different companies.

Dr. Török is a dentist and dental technician and he was the youngest specialist in implantology in “Who is who”, maintains a private practice for general dentistry with focus on implants and prostodontics in Nurnberg, Germany.

He is teaching implantology in the PSI (Polish Society for Implantology) and at the University „Carol Davila“ in Bucharest, Romania. Additionally, he is an editorial committee member and published articles about augmentation, serves on the editorial board in the Journal for maxillofacial surgery in Romania. Also, he hosts meetings in his institute where he provides education courses and live surgeries.

Dr. Roland Török is an active member of numerous associations: the DGOI (examined expert), BDIZ, EDI, diplomat of the ICOI (since 2002) and the SRCOMF (Romanian society for MKG). Director of the „Titanium Club“, Program coordinator „Poseido“ and councilor of the SEUCC (South European Union Counter Cancer) /SEHNOS (South European Head and Neck Oncology Society).
